OUR MISSION

The BioINSouth project supports decision-makers in integrating ecological limits into regional bioeconomy strategies, focusing on circular bio-based activities. Coordinated by SPRING cluster and co-funded by the EU and CBE JU, it brings together fifteen partners from nine countries towards forming engaged Multi-Actor Regional Groups from the QH, upon which eight Regional HUBs will be created for the promotion and implementation of circular bioeconomy principles.

OBJECTIVES

- Setting up the Multi-Actor Regional Groups (MARGs) by involving at least eight stakeholders of the Quadruple Helix, per region
- Establishing the BioINSouth HUBs in each of the eight regions by providing guidelines for the action plan and mobilisation of the HUBs
- Developing new, or improve methodologies and digital tools for the assessment of environmental impact and circularity of bio-based systems
- Constructing an integrated toolkit to support decision-makers incorporate considerations of ecological limits into regional bioeconomy strategies and roadmaps
- Demonstrating the use of the integrated toolkit in HUBs level, while performing analyses of regional policies
- Co-developing policy recommendations for sustainability and circularity for strengthening integration into regional bioeconomy strategies
- Ensuring wide visibility and replication of the BioINSouth experience and results

IMPACT

- Enhance understanding of challenges and benefits of circular, bio-based solutions, especially in Widening countries and lagging regions without bioeconomy strategies
- The eight BioINSouth regions will implement monitoring systems and assessment of circularity and sustainability in bio-based systems, and will serve as pilots for the project's replication strategy
- BioINSouth multi-actor strategy aims to ensure efficient resource use, enhance economic performance and promote SSbD concepts within the bio-based sector
